

CONTENTS

1	PRESENTATION ABSTRACTS.....	13
1.1	22 June 2006, Morning Session	13
1.1.1	Groundwater in Europe, Development of Groundwater Legislation	13
1.1.2	Position of the European Parliament on the Groundwater Directive	18
1.1.3	EU Groundwater Legislative Framework (WFD, GWD, CIS, GW C, Drafting Groups ...)	22
1.1.4	Drafting Group GW 1 – Groundwater Monitoring	27
1.1.5	Drafting Group GW 2 – Protected Areas.....	34
1.1.6	Drafting Group GW 3 – Direct and Indirect Input	36
1.1.7	Drafting Group GW 5 – Mediterranean EUWI/WFD Joint Process.....	42
1.2	22 June 2006, Afternoon Session	47
1.2.1	Groundwater – A Valuable Resource for Drinking Water; Strategies of Groundwater Protection under the European Legislative Framework in Germany.....	47
1.2.2	Natural Background Levels Assessment, the French Approach.....	50
1.2.3	Groundwater in the Danube River Basin	56
1.2.4	Groundwater Management in Spain: The Way Ahead.....	63
1.2.5	Problems of a New Member State Concerning Groundwater	69
1.2.6	Denmark - Agriculture, Nitrate and Groundwater	71
1.3	23 June 2006, Morning Session	74
1.3.1	Science Policy Interface, Outline of FP7	74
1.3.2	WFD Key Issues and Research Needs.....	79
1.3.3	Use of Isotopes for Tracing Pollution Sources in Groundwater (Characterisation).....	83
1.3.4	BRIDGE – Background Criteria for the Identification of Groundwater Threshold Values.....	88
1.3.5	Groundwater Ecology as a Necessary Link to the EU Water Framework Directive	94
1.3.6	water4all	100
1.3.7	Visualising Groundwater – A Tool to Aid Implementation of the WFD	106
1.4	23 June 2006, Afternoon Session	116
1.4.1	The New EU Legislative Framework for Groundwater – View of an International Professional Specialist NGO	116
1.4.2	Groundwater Legislation and Water Supply in the Danube River Basin.....	122
1.4.3	Sustainable Groundwater Management with the Use of Isotope Techniques.....	124
2	POSTER ABSTRACTS.....	126
2.1	Groundwater Body Characterisation.....	126
2.1.1	An Inventory of the Influence of the Groundwater Quality on the Surface Water Quality in Noord-Brabant (Southern Netherlands)	126
2.1.2	Mapping the Vulnerability of European Groundwater to Pesticide Leaching.....	128
2.1.3	Development of an Aquifer DNA Microarray for the Biological Assessment of Groundwater Ecosystems	130

2.1.4	The Hydrochemical Geogenic Background of Groundwater Bodies in Austria	132
2.1.5	Model Groundwater Distribution and Networking System in an Arsenic Affected Area in West Bengal	134
2.1.6	Integrating Groundwater Dependent Ecosystems into the Shannon River Basin Management Plan	136
2.1.7	Natural Background of Concentrations and Stable Isotope Composition of Nitrate in the Soil Water at Ljubljansko Polje (Slovenia)	138
2.1.8	Modelling of Attenuation Processes for Conservative Components in the River Catchment: A Case Study	140
2.1.9	Determination of Natural Background Levels (NBL) and Threshold Values (TV) for the CKS_0200_GWL_1 Groundwater Body in Flanders and Application to the Zoersel Forest Nature Reserve	142
2.1.10	Delineation of Groundwater DWPA and GWB, a Risk Assessment Elaborated for a Dutch Province (Gelderland, River Rhine Basin).....	144
2.1.11	Hydrogeochemical Characterization of GW from Hard-Rock Aquifers for Derivation of Pollutant Thresholds (Example from Brittany-France)	147
2.1.12	Interactions between Groundwater and Surface Water Systems or Dependent Terrestrial Ecosystems.	150
2.1.13	Biocenoses in Groundwater – a Challenging Issue of the Swiss Water Protection Ordinance.....	152
2.1.14	Aquifer Typologies: A Practical Framework for an Overview about Major Groundwater Composition on a European Scale	154
2.1.15	Impact of Long Distance Air Pollution on Sensitive Karst Groundwater Resources Estimated by Means of PB-, S-, O- and SR-Isotopes	156
2.1.16	Delineation of Groundwater Bodies in Spain.....	158
2.1.17	Baseline Groundwater Quality and Threshold Definition in the Vouga River Basin with a View to the Adoption of a Directive of the European Parliament and of the Council on the Protection of Groundwater against Pollution.	160
2.1.18	Groundwater in Bangladesh.....	162
2.1.19	Current Practice of Drinking Water Protection Zones in Slovenia	165
2.1.20	Common Transboundary Groundwater Body Karavanke between Slovenia and Austria.....	166
2.1.21	Characterising the Interconnections and Heterogeneities of Water Bodies by Multi Isotopic and Geochemical Approaches – The CARISMEAU Research Project in the Adour-Garonne District (South France)	168
2.1.22	Establishment and Updating of Drinking Water Safeguard Zones in Relation to Aquifer Evolution	170
2.1.23	Groundwater protection zones identification and measures enforcement in Italy	173
2.2	Risk Assessment.....	176
2.2.1	Groundwater Threshold Values in Subcatchment Rijn-West, the Netherlands: Testing the BRIDGE Methodology.....	176
2.2.2	Risk Assessment of Groundwater Bodies: A Methodological Approach to Assist in Pressure and Impact Analysis	178
2.2.3	Chemical Status of Groundwater Bodies in Lithuania	180
2.2.4	Risk Factors for Phosphorus Leaching from Agriculturally Used Areas in Upper Austria	182

2.2.5	Monitoring Groundwater Nitrate Pollution in a Regional System Coupling Hydrogeology with Multi-Isotopic Methods: The Case of Osona (NE-Spain)	184
2.2.6	Protected Areas of Groundwater Bodies in Hungary.....	186
2.2.7	Groundwater Use in Irrigation in an Arsenic Affected Area of West Bengal	187
2.2.8	Mega Sites and Cities in EU Water Policy.....	189
2.2.9	Impact of Man Induced Groundwater Injection/Infiltration on the Qualitative Status of Groundwater Bodies.....	191
2.2.10	WATERMARK – A Multidisciplinary Research Initiative for the EU Water Framework Directive.....	193
2.2.11	Time – Input : An Innovative Vulnerability Assessment Scheme for Groundwater Protection.....	195
2.2.12	Austrian Network of Isotopes in Precipitation (ANIP) as a Supporting Tool for Groundwater Management	197
2.2.13	Contribution of Various Groundwater Pollution Assessment Tools to the Characterisation of Nitrate Vulnerable Zones in Portugal	199
2.3	Groundwater Quality and Quantity Monitoring	202
2.3.1	Water Protection Contracting - Successful Cooperation.....	202
2.3.2	Quality Management of Groundwater Monitoring.....	205
2.3.3	Nordtest Environmental Sampler Certification Scheme	207
2.3.4	Quality Assurance during Groundwater Quality Monitoring.....	210
2.3.5	Groundwater Quality Monitoring in the Slovak Republic	213
2.4	Analytcs	214
2.4.1	Assessment of Natural Background Levels (NBLs) in the Upper Rhine Valley (France, Germany and Switzerland).....	214
2.4.2	Influence of Seepage of Biologically Treated Waste Water on the Groundwater Condition.....	215
2.5	Data Handling - Data Visualisation	216
2.5.1	ADES: A French National Groundwater Database.....	216
2.6	Status and Trend Assessment	218
2.6.1	Polish Methodology for Assessment of the Chemical Status of Groundwater.....	218
2.6.2	Recommendations for Groundwater Threshold Values in the Netherlands	220
2.7	Public Participation	222
2.7.1	Evaluation of the Water Management Effectiveness of Catch crops	222
2.7.2	Cost-Effective Measures to Protect Groundwater by Co-operative Agreements	225
2.7.3	OÖ. Wasserschutzberatung and the Upper Austrian Regional Project Grundwasser 2000 NEU	227
