*Due to a high scatter between the results of the participating laboratories, the determination of an assigned value is not possible.

Within the framework of internal quality assurance measures, an informative comparison with the mean value calculated from the results of the group of accredited laboratories without Hampel outliers (H99, H95) is recommended:

trans-1,2-Dichloroethene: MV(n=16): 2.033 +/- 1.24 U(k=2)

Legend:

Assigned value	Target value for proficiency assessment of the participants (3 significant digits)
U (k=2)	Expanded uncertainty (k=2) of the assigned value (3 significant digits)
Criterion	Specified value for the determination of the z-score in the given unit (3 significant digits)
Criterion [%]	Specified value for the determination of the z-score in % of the assigned value (2 significant digits)
