

TABLE OF CONTENTS

VOLUME 1

- 1. GENERAL DATA**
 - 1.1. Project Owner Information**
 - 1.2. Information about the Environmental Impact Assessment Report Author**
 - 1.3. Project**
 - 1.4. Design Description and it Stages (construction, operation, decommissioning)**
 - 1.5. Design Alternatives**
 - 1.6. Information Regarding the Production and Energy Resources Requirement**
 - 1.7. Information on Raw Materials and Chemical Substances or Products**
 - 1.8. Information Regarding the Activity Generated Physical Pollution**
 - 1.9. Territorial Planning in the Site Area**
 - 1.10. Information on Existing Infrastructure and Connecting to It References**
- 2. TECHNOLOGICAL PROCESSES**
 - 2.1. Activities during the Construction Phase**
 - 2.1.1. General Arrangement**
 - 2.1.2. Completion of the Construction of the NPP Units 3 and 4**
 - 2.1.3. Site Temporary Buildings and Facilities**
 - 2.2. Technological Processes (during the Unit 3 and Unit 4 Operation)**
 - 2.2.1. Nuclear Safety Principles and General Design Criteria**
 - 2.2.1.1. Defense-in-Depth Principle**
 - 2.2.1.2. ALARA Principle**
 - 2.2.1.3. Grouping and Separation Principle**
 - 2.2.1.4. General Safety Design Criteria**
 - 2.2.1.5. CANDU Design Requirements**
 - 2.2.2. Process Systems Description**
 - 2.2.2.1. NPP Buildings and Structures**

- 2.2.2.2. NPP Equipment and Systems**
- 2.3. Decommissioning Activities**
 - 2.3.1. The Decommissioning Concept**
 - 2.3.1.1. Definition**
 - 2.3.1.2. The Generic Options for Decommissioning**
 - 2.3.1.3. Events and Activities with Significant Impact on Nuclear Safety**
 - 2.3.1.4. Criteria for the Selection of the Decommissioning Strategy**
 - 2.3.2. Equipment, Installations, Tools and Buildings which Are Going to Be Decommissioned**
 - 2.3.2.1. The Concise Description of Cernavoda NPP U 3 and U4 and the Significant Features in the Decommissioning Process**
 - 2.3.2.2. Main Operations Required in the Cernavoda NPP U3 and U4 Decommissioning Process**
 - 2.3.2.3. Hazardous Chemical Substances Stored in the Nuclear Units**
 - 2.3.3. Techniques of Cernavoda NPP U3 and U4 Decommissioning**
 - 2.3.3.1. Decontamination Operations**
 - 2.3.3.2. The Disassembly Techniques**
 - 2.3.4. Protection Measures for the Personnel, Public and Environment**
 - 2.3.4.1. Measures for the Personnel Protection**
 - 2.3.4.2. Measures for the Public and Environment Protection**
 - 2.3.4.3. Emergency Plan**
 - 2.3.4.4. The Physical Protection and Security of the Nuclear Plant**
- References**
- 3. WASTE MANAGEMENT**
 - 3.1. Waste Generation During the Cernavoda NPP Units 3 and 4 Completion Period**
 - 3.2. Waste Generation During the Cernavoda NPP Units 3 and 4 Operation Period**
 - 3.2.1. Radioactive Waste**
 - 3.2.1.1. General Principles**
 - 3.2.1.2. Waste Generation**
 - 3.2.1.3. Management of Solid Radioactive Waste**
 - 3.2.2. Non - Radioactive Waste Management**
 - 3.2.2.1. Generation of Non - Radioactive Wastes**
 - 3.2.2.2. Non-Radioactive Wastes Management**
 - 3.2.2.3. Non-radioactive Wastes Elimination and Recycling**

- 3.2.2.4. Conclusions**
- 3.3. Waste Generated During the Decommissioning Process**
- 3.3.1. Waste Generation**
- 3.3.2. Waste Management**
- References**

Volume 2

- 4. POTENTIAL IMPACT ON ENVIRONMENT COMPONENTS. MITIGATION MEASURES.**
- 4.1. Potential Impact on Waters**
- 4.1.1. Hydro-geological Conditions of the Site. Underground Waters.**
- 4.1.2. Hydrological Characterization of the Main Water Source, the Branch Dunarea Veche, the thermal regime**
- 4.1.2.1. Water Flows and Water Levels on the Danube in the Neighborhood of the Cernavoda NPP Site**
- 4.1.2.2. Characterization of Water Temperature on the Danube Stretch in the Neighborhood of the Cernavoda NPP Site**
- 4.1.3. Characterization of the Danube Water Quality in the Neighborhood of the Cernavoda NPP Site, According to Physical, Chemical and Microbiological Indicators, Radioactivity**
- 4.1.4. Biocenosis Components in the Aquatic Environment of the Branch Dunarea Veche**
- 4.1.5. Characterization of the Danube - Black Sea Canal**
- 4.1.5.1. Water Races and Characteristic Cross-Sections**
- 4.1.5.2. DBSC Operation Parameters**
- 4.1.6. Characterization of the DBSC Water Quality According to Physical, Chemical and Microbiological Indicators, Radioactivity**
- 4.1.7. Biocenosis Components in the Aquatic Environment of the DBSC**
- 4.1.8. Other Water Bodies**
- 4.1.9. Water Supply to Units 3 and 4 and to Other Current or Predicted Water Users**
- 4.1.9.1. Water Sources**
- 4.1.9.2. Water use and consumption at Cernavoda NPP**
- 4.1.9.3. Other Current or Predicted Water Users in the Units 3 and 4 Impact Zone**
- 4.1.9.4. Solutions Considered in Specialized Studies for Increasing the Water Source Capacity to Provide the Necessary Flows to Cernavoda NPP**

- 4.1.10. Hydrotechnical Installations**
- 4.1.10.1. Water Intake and Canal**
- 4.1.10.2. Distribution Pool**
- 4.1.10.3. Circulation Water System**
- 4.1.10.4. Raw Service Water Installations**
- 4.1.10.5. Back-Up Service Water System**
- 4.1.10.6. Fire Water System**
- 4.1.10.7. Domestic Water System**
- 4.1.10.8. Emergency Cooling Water**
- 4.1.11. Site Drainage Systems**
- 4.1.12. Waste Water Management During the Construction Period**
- 4.1.13. Estimated Impact on Waters during the Construction Period**
- 4.1.14. Waste Water Management During Operation**
- 4.1.14.1. Description of the Waste Water Generation Sources**
- 4.1.14.2. Reuse / Recirculation of Discharged Waters**
- 4.1.14.3. Installations for Decreasing the Pollutant Load**
- 4.1.14.4. Spent Water Collection Systems**
- 4.1.14.5. Quantities and Physical and Chemical Characteristics of the Discharged Waters**
- 4.1.14.6. Locations for the Discharge of the Waste Waters; a Comparison with the Allowable Limits for Discharges**
- 4.1.15. Estimated Impact of Taking Over the Necessary Water Flow for Cernavoda NPP Units 1, 2, 3, 4 and Discharging It**
- 4.1.15.1. Impact on the Danube**
- 4.1.15.2. Impact on the DBSC Race 2**
- 4.1.15.3. Impact on the DBSC Race 1 and on the Derivation Canal**
- 4.1.16. Estimated Impact on Ground Water. Prevention Measures.**
- 4.1.17. Estimated Thermal Impact of the Effluent from Units 1, 2, 3, 4 on the Branch Dunarea Veche**
- 4.1.17.1. Thermal Impact of the Units 3 and 4 Effluent on the Danube**
- 4.1.17.2. Cumulated Thermal Impact of the Effluents from the Units 1, 2, 3, 4 on the Danube**
- 4.1.18. Estimated Thermal Impact of Discharging the Effluent from Units 1, 2, 3, 4 into the Race 2 of the Danube Black Sea Canal**
- 4.1.18.1. Thermal Impact of the Units 3 and 4 Effluent During its Discharge to the DBSC Race 2**
- 4.1.18.2. Cumulated Thermal Impact of the Effluents from Units 1, 2, 3, 4 during its Discharge to the DBSC Race 2**

- 4.1.19. Estimated Impact of the NPP Effluent on Danube Water Quality Indicators**
 - 4.1.20. Estimated Impact of the NPP Effluent on Quality Indicators in the DBSC Water**
 - 4.1.21. Influence of Specific Chemical Substances in the NPP Effluent on Water Quality in the Danube or DBSC**
 - 4.1.22. Estimated Impact of the NPP Effluent on Flora and Fauna in the Branch Dunarea Veche**
 - 4.1.23. Estimated Impact of the NPP Effluent on Flora and Fauna in the DBSC Race 2**
 - 4.1.24. Estimated Impact of the NPP Effluent on Danube Water Use and on DBSC Water Use**
 - 4.1.25. Measures for Mitigation and Prevention of the Impact on Waters**
- References**

Volume 3

- 4.2. Potential Impact on Air**
 - 4.2.1. General Data**
 - 4.2.1.1. Climate and Meteorological Characteristic Data on the Cernavoda NPP Site**
 - 4.2.1.2. Data Regarding Temperature, Precipitations, Dominant Wind, Solar Radiation, Pollutants Transport and Diffusion Conditions**
 - 4.2.1.3. Characterization of Pollutant Sources in the Zone of Unit 3 and Unit 4**
 - 4.2.1.4. Air Pollution Data in the Units 3 and 4 Neighbor Area, Noise Level, Radioactivity**
 - 4.2.2. Pollutant Sources During the Construction Period**
 - 4.2.3. Sources and Pollutants Generated During the Operation Period**
 - 4.2.3.1. Characterization of Air Pollutant Sources During the Operation Period**
 - 4.2.3.2. Emissions of Radioactive Pollutants to Atmosphere**
 - 4.2.4. Estimated Impact Regarding Air Pollution and Noise During the Units 3 and 4 Construction Period**
 - 4.2.5. Estimated Air Pollution and Noise Level During the Units 3 and 4 Operation Period**
 - 4.2.6. Impact Mitigation Measures During the Construction Period**
 - 4.2.7. Impact Mitigation Measures During the Units 3 and 4 Operation Period**
 - 4.2.7.1. Collection Systems and Effluent Control**
 - 4.2.7.2. Radioactive Gaseous Effluent Monitoring**

- 4.2.7.3. Other Measures for Mitigating the Impact on Air**
- References**
- 4.3. Potential Impact on Soil**
- 4.3.1. Dominant Soil Types**
- 4.3.2. Land Use and Cultivated Plants**
- 4.3.3. Results of Chemical Analyses of Soil Samples, Radioactivity**
- 4.3.3.1. Soil Samples Chemical Analyses**
- 4.3.3.2. Radioactivity**
- 4.3.4. Sources of Soil Pollution During the Construction Period**
- 4.3.5. Sources of Soil Pollution During the Operation Period**
- 4.3.6. Estimated Impact on Soil During the Units 3 and 4 Completion Period**
- 4.3.7. Estimated Impact on Soil During the Units 3 and 4 Operation**
- 4.3.8. Impact Mitigation Measures for Soil**
- References**
- 4.4. Impact on Subsoil Geology**
- 4.4.1. Characterization of Subsoil of the Site**
- 4.4.2. Tectonic Structure, Neotectonic and Seismic Activity**
- 4.4.2.1. Tectonic Structure and Neotectonic Activity**
- 4.4.2.2. Seismic Activity**
- 4.4.3. The Protection of the Subsoil and of the Underground Water Sources**
- 4.4.4. Underground Geotechnical Characteristics**
- 4.4.5. Protected Geological Sites**
- 4.4.6. Estimation of the Impact on Subsoil**
- References**
- 4.5. Potential Impact on Biodiversity**
- 4.5.1. Information about Biotope Conditions**
- 4.5.2. Flora**
- 4.5.3. Terrestrial Fauna**
- 4.5.4. Impact on Flora and Fauna During the Units 3 and 4 Construction Period**
- 4.5.5. Impact on Flora and Fauna During the Units 3 and 4 Operation**
- References**
- 4.6. Potential Impact on Landscape**
- 4.6.1. Information about Landscape**

- 4.6.2. Relief Features and Geomorphology on the Cernavoda NPP Site**
- 4.6.3. Estimated Impact on Landscape**
- 4.6.4. Measures for Preventing Negative Effects on Landscape**
- References**
- 4.7. Potential Social and Economic Impact**
 - 4.7.1. Demography**
 - 4.7.2. Economic Activities**
 - 4.7.3. Population Health Condition**
 - 4.7.4. Estimated Social and Economic Impact**
 - 4.7.5. Impact Mitigation Measures**
 - References**
- 4.8. Potential Impact on Cultural Conditions and Patrimony**
 - 4.8.1. Social and Cultural Units and Conditions**
 - 4.8.2. Cultural, Archaeological, Historical Patrimony**
 - 4.8.3. Estimated Impact and Mitigation Measures**
 - References**
- 4.9. Radiological Impact**
 - 4.9.1. Radiation Sources**
 - 4.9.1.1. Reactor Core**
 - 4.9.1.2. Primary Heat Transport System**
 - 4.9.1.3. Primary Coolant Purification Circuit**
 - 4.9.1.4. Main Moderator Circuit**
 - 4.9.1.5. Moderator Cover Gas System**
 - 4.9.1.6. Moderator Purification Circuit**
 - 4.9.1.7. Liquid Zone Control System**
 - 4.9.1.8. End Shield Cooling System**
 - 4.9.1.9. D₂O Supply System**
 - 4.9.1.10. D₂O Cleanup System**
 - 4.9.1.11. D₂O Vapour Recovery System**
 - 4.9.1.12. Annulus Gas System**
 - 4.9.1.13. Fuel Handling Systems**
 - 4.9.1.14. Moderator and Primary Coolant Deuteration- Dedeuteration Systems**
 - 4.9.1.15. Spent Fuel Bays**

- 4.9.1.16. Spent Fuel Bay Cooling and Purification System**
 - 4.9.1.17. Spent Resin Storage Vaults**
 - 4.9.1.18. Radioactive Liquid Waste Management System**
 - 4.9.1.19. Ventilation Systems**
 - 4.9.1.20. Steam Generators and Feedwater Systems**
 - 4.9.1.21. Decontamination Centre**
 - 4.9.2. Derived Emission Limits**
 - 4.9.2.1. Methodology for Calculation of DELs**
 - 4.9.2.2. Administrative Limits for Release of Both Liquid and Gaseous Effluents**
 - 4.9.3. The Impact on Both the Waters and Air**
 - 4.9.4. Radiation Doses for Population**
 - 4.9.5. Effects of other Nuclear Objectives from Cernavoda NPP Platform on the Constructors at Unit 3, respectively Unit 4**
 - 4.9.6. Radiation Doses for Operating Personnel**
 - 4.9.7. Engineered provisions for radiation protection of the personnel and the public**
 - 4.9.7.1. Provisions for Personnel Protection**
 - 4.9.7.2. Provisions for Public Protection**
 - 4.9.8. Transboundary Effects**
- References**
- 5. ALTERNATIVE ANALYSIS**
 - 5.1. The Evolution of the Main Macro-Economic and Power Parameters of Romania during 2005 – 2025**
 - 5.2. Elaboration of scenarios for the development of the electric and thermal power sector with and without Cernavoda NPP- Unit 3 for the period 2005 –2025**
 - 5.2.1. Evolution of the Electric Power Demand**
 - 5.2.2. Provision of Necessary Capacities for Electric Power Demand**
 - 5.2.3. Construction of Scenarios for Analysis of Cernavoda Unit 3 Installation Efficiency**
 - 5.3. Analysis and Comparison of Scenarios for Electric and Thermal Power Sector**
 - 5.3.1. Comparison of the Proposed Scenarios as per the Technical-Economic Criteria**
 - 5.3.2. Comparison of Proposed Scenario as per the Environmental Impact**

- 5.3.2.1. **The Impact on the Surface Waters under the Considered Scenarios**
 - 5.3.2.2. **The Impact on the Soil, Subsoil, and Underground Waters under the Considered Scenarios**
 - 5.3.2.3. **Impact on the Health under the Considered Scenarios**
 - 5.3.2.4. **The Impact on Agriculture and Materials under the Considered Scenarios**
 - 5.3.2.5. **Quantification of Total Environmental Impact under the Considered Scenarios**
 - 5.4. **Comparison of Scenarios in Point of Social Impact**
 - 5.5. **Multi-Criteria Analysis of the Scenarios**
 - 5.6. **Considerations regarding the alternative to build Cernavoda - Unit 4**
- References
- 6. **PROGRAMS FOR ENVIRONMENTAL MONITORING**
 - 6.1. **Activities Concerning Environment Protection**
 - 6.2. **Surveillance of Environmental Factors Quality**
 - 6.2.1. **Environmental Radioactivity Monitoring Program**
 - 6.2.1.1. **Routine Monitoring Program**
 - 6.2.1.2. **Supplementary Programs**
 - 6.2.2. **Inactive Environmental Monitoring Program**
 - 6.2.2.1. **Routine Monitoring Program**
 - 6.2.2.2. **Supplementary Programs**
- References
- 7. **RISK SITUATIONS ANALYSIS**
 - 7.1. **Accidents Classification**
 - 7.2. **Natural Risk**
 - 7.3. **Events Induced by Human Activities External to Cernavoda NPP Units 3 and 4**
 - 7.3.1. **Potential Hazardous Sources Existing within Cernavoda NPP Units 3 and 4 Site**
 - 7.3.2. **Events Induced by Human Activities in Cernavoda NPP Unit 3 and respectively Unit 4 Influence Zone**
 - 7.3.2.1. **Industrial Activities**
 - 7.3.2.2. **Transports within the Cernavoda NPP Unit 3 and respectively Unit 4 Influence Zone**
 - 7.3.2.3. **Military Objectives and Activities**

- 7.4. Events with Radiological Consequences Postulated for Cernavoda NPP Unit 3 and respectively Unit 4**
 - 7.4.1. Classification of the Initiating Events with Radiological Consequences**
 - 7.4.2. Acceptance Criteria for the Events with Radiological Consequences Postulated for Cernavoda NPP**
 - 7.4.3. Radiological Consequences (Radiation Doses) of the Events Postulated for Cernavoda NPP**
 - 7.4.4. Analysis on the Occurrence Possibility of the Events with Significant Environmental Impact**
 - 7.4.5. Transboundary Effects of Radiological Consequences Events Postulated for Cernavoda NPP Units 3 and 4**
- 7.5. Measures to Reduce the Cernavoda NPP Risk**
 - 7.5.1. Technical and Administrative Preventive Measures**
 - 7.5.2. Protective measures to reduce the Cernavoda NPP Units 3 and 4 Risk**
 - 7.5.3. Programs**
- 7.6. Risk Assessment of the Accidents with Impact on Environment and Public Health During Cernavoda NPP Units 3 and 4 Completion**
- 7.7. Conclusions**
 - References
- 8. TECHNICAL OR PRACTICAL DIFFICULTIES**
- 9. NON-TECHNICAL SUMMARY**
 - 9.1. General Data**
 - 9.2. Brief Description of the Project**
 - 9.3. Methodology**
 - 9.4. Impact on Waters**
 - 9.5. Impact on Air**
 - 9.6. Impact on Soil, Ground Water, Subsoil**
 - 9.7. Impact on Terrestrial Flora and Fauna**
 - 9.8. Impact on Landscape**
 - 9.9. Social and Economic Impact**
 - 9.10. Radiological Impact**
 - 9.11. Safety Principles Considered in the Design**

9.12. Other Authorizations

Glossary of Acronyms

Annexes

Annex A.4.1.2. Variations of the Danube water monthly average temperatures at Cernavoda HS (Annex to Chapter 4.1.2)

Annex A.4.1.3. Values of physical, chemical and microbiological indicators in the Danube (Annex to Chapter 4.1.3)

Annex A.4.1.4. Results of biological analyses of water samples from the Danube (Annex to Chapter 4.1.4)

Annex A.4.1.6. Values of physical, chemical and microbiological indicators in the DBSC (Annex to Chapter 4.1.6)

Annex A.4.1.7. Results of biological analyses of water samples from the DBSC (Annex to Chapter 4.1.7)

Annex B. Answers to Mr. Jan Howerkamp questions
