21 September 1998

Dear ladies and Gentlemen,

**K2/R4 Public Consultation**

We have today received an addendum to the Environmental Impact Assessments for the above project. This considers non-nuclear alternatives. Although not part of the documentation pack required to be issued we felt that you would like to receive it without delay to help you in the consideration of any responses. To reduce the size of the file to be E-mailed we have not included the maps and photograph which occupy over 4Mb of space.

We do not yet have the finalised hard copy but will print off from the electronic form and distribute it to those who requested the full documentation pack but may not have access to a PC.

I hope this will be useful to you.

Yours sincerely,

A Kochugov  
Public Consultation Manager
