CONFERENCE OUTLINE

These are challenging times for green finance. While the need to finance a low-carbon and sustainable transition is growing, many policymakers seem to have other priorities. All the more reason to rethink and, where necessary, adapt strategies. At our conference, we will discuss options for successful implementation and further development of regulatory frameworks, in particular on climate and biodiversity. In addition, a session will be dedicated to international perspectives on green finance, with a special focus on countries in Central, Eastern and Southeastern Europe. The aim is to build bridges between science and practice in the financial sector, policy and administration. This will involve identifying knowledge and data gaps and discussing the need for practical tools.

The conference is organized as part of the series “Science & Practice for Green Finance” by the Austrian Environment Agency, the Austrian National Bank (OeNB) and the Federal Ministry of Agriculture and Forestry, Climate and Environmental Protection, Regions and Water Management in cooperation with the German-speaking environmental agencies as part of the DACH-LIE-LUX Green Finance Working Group.

Pre-event as part of the series “high-level expert dialogue on the energy transition at the Oesterreichische Nationalbank”

Wednesday, May 14, 2025

16:00 **High-level expert dialogue**
Can green finance save the world?
